

DO YOU HAVE DUCKS?

ARE YOU FEEDING THEM RIGHT?

ALL POULIN GRAIN POULTRY FEEDS MEET THE UNIQUE NIACIN REQUIREMENTS OF DUCKS!

Niacin is an essential nutrient for duck health. It plays a key role in energy production, supports metabolic processes, maintains a healthy nervous system and is vital for bone and feather development.

Ducklings and laying ducks need at least 25 mg of niacin per 1 lb of feed

Adult ducks need at least 13-18 mg of niacin per 1 lb of feed

TYPE OF DUCK	AGE	FEED	NIACIN LEVELS (MG/LB)
Ducklings	1 day to 4 weeks	<ul style="list-style-type: none"> Gamebird Starter/Grower Crumbles Chick Starter Crumbles 	45 40
