

SELENIUM IN HORSES

EQUINE SELENIUM REQUIREMENTS

In general, the total amount of selenium in a horse's diet should be:

1-3 mg per day
for the average-sized horse

SELENIUM IN THE NORTHEAST

Soil in the northeastern United States is naturally low in selenium

% daily value of Se
in Northeast forages
< 0.0025%

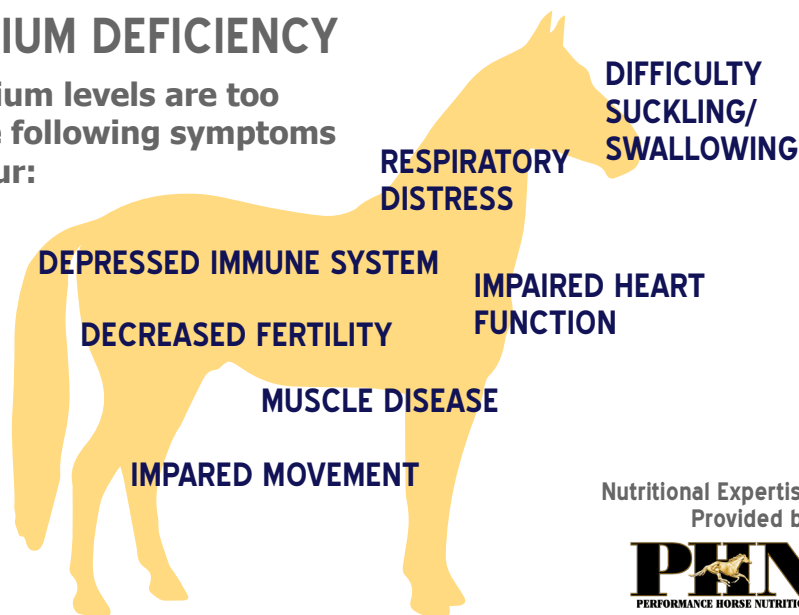

SELENIUM & HEALTH

Maintaining the required level of selenium positively affects a horse's health

IMMUNITY FROM DISEASE
IMPROVES THYROID FUNCTION
REPRODUCTIVE HEALTH
OPTIMAL GROWTH
IMPROVES MUSCLE FUNCTION

SELENIUM DEFICIENCY

If selenium levels are too low, the following symptoms can occur:

Nutritional Expertise
Provided by

ORGANIC SELENIUM

More readily absorbed and therefore more readily available than inorganic selenium

THE ORGANIC FORM OF SELENIUM IS COMMONLY KNOWN AS SELENIUM YEAST

100% ORGANIC SELENIUM is included in all three lines of Poulin Grain's equine feeds: EQUI-PRO®, E-TEC® and Decade®.
